John, Re: Security review.

STAT

was here on

Tues. Aug 4 for a Security review. He asked me to do

two things and said all would be in order when they were done:

- ① Make a document log which I have done.
- ② Remove all true names from documents in the safe.

This I have done. I can keep true names in my unclassified address book, but they can't be kept in the safe where they

can be associated with a contract.

Son was concerned about my keeping copies of your contract status reports in my safe. As I remember, this was reviewed before you gave me the first one and I told him then.

Son wants to review the question again, he thinks I should not keep them and he took one copy of one the old ones with him.
